

Catheter quiver

Standard version and Long version

Optimum protection, hygienic storage

The catheter holder is used for the proper storage of catheters. In order to meet the increasing hygiene requirements on the wards, HERZmed GmbH designed the catheter holder in accordance with the hygiene requirements for sterile supplies (DIN 58953-8: 2010-05).

The stable unit protects against dust, dirt, excessive exposure to light and damage caused by mechanical influences. A dry, sealed and clean interior and smooth, powder-coated surfaces enable optimum hygienic cleaning. The catheter holder and storage box unit is therefore particularly suitable for use in clinics, hospitals, doctors' surgeries and the care sector.

Aluminum, powder-coated in light grey (RAL 7035)
other RAL colors on request

Mounting on standard rail

Wall bracket and accessories optionally available.

Back view

Partition plate

Highlights

- Compact design
- Flexible mounting option
- Transparent lid
- Hygienic storage thanks to closed system
- Flexible height subdivision
- Sealing possible
- Individually adaptable to the customer's needs

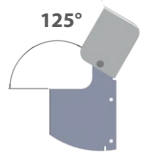

Technical details

Transparent lid

The transparent lid provides a quick and easy view into the quiver and allows the filling quantity to be checked. Thanks to the opening angle of 125°, easy filling and removal is guaranteed.

Sealing possible

125°

Repainting possible

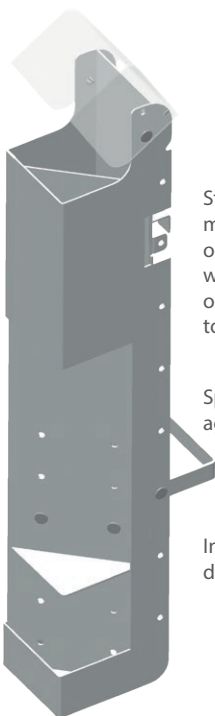

The catheter holders are supplied as standard in white aluminum RAL 9006 as standard. Repainting in accordance with the RAL color code is possible.

Partition plate inside

A removable divider divides the interior of the cooker diagonally. This division of space makes it possible to separate 2 different catheters.

Various mounting options

The aluminum quiver comes with various mounting options. So that it is always ready for use, it can either be mounted directly on a wall or hung on standard rails.

Standard rail bracket for mounting on a standard rail or optionally on the wall with the wall bracket. Other mounting options are possible according to customer requirements.

Spacer bracket for supporting against the wall in two sizes.

Including divider plate with two height dividers for different catheter sizes.

Ergonomic solutions for your workplace

The catheter holder can be individually adapted to customer requirements. Thanks to different interior layouts and various fastening options, it is ready for use anywhere and at any time. It can also be repainted in other RAL colors on request. The product also focuses on ergonomic solutions. This is characterized, among other things, by the optimal removal of the catheters.

Technical specifications

Size and weight Standardversion:

100 x 120 x 703 mm (B x T x H)
2200 g Empty weight

Size and weight Langversion:

100 x 120 x 1052 mm (B x T x H)
3850 g Empty weight

Coloring:

Body: RAL 9006,
Recoating possible on request
Cover: Transparent

Material:

Cover: PETG (glycol-modified polyethylene terephthalate);
Body and parts: White aluminum, powder-coated;
Conical clip: PA66 plastic
